

How to print out Spiriti_PianoReduction:

The original page size is A3, but if you have really good eyes, the part should be readable even in A4.

Whatever size you choose, *always* select "Fit to page" or similar, to avoid parts of the pages being cut off.

When you print the part in double-sided format, the page turns would work. Only, as there is no possibility to turn between the pages 7 and 8 of the last movement, it is recommended to print these last two pages separately (double-sided). A blank page has been inserted between pages 7 and 8 of the last mvt for this purpose.
